Objective

Driven 3rd-year Computer Science student at New Mansoura University specializing in Data Engineering. Possesses a solid foundation in Python, SQL, PySpark, relational database design, and cloud infrastructure. Currently building advanced hands-on data skills through the Digital Egypt Pioneers Initiative (DEPI) Data Engineering track and NTI Cloud Computing training. Eager to leverage strong problem-solving skills and pipeline development expertise to contribute to scalable data solutions.

Education

Bachelor of Computer Science | *New Mansoura University, Egypt* September 2023 – Present

- Current Status: Completing 3rd Year.
- Relevant Coursework: Database Management Systems (DBMS), Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems.

TECHNICAL SKILLS

- **Data Engineering & Databases:** SQL (Relational Database Design, Query Optimization), PySpark, Data Pipeline Concepts (ETL/ELT), Database Management Systems (SQL Server, MySQL).
- **Programming Languages:** Python, SQL, C#, C++.
- **Cloud & DevOps Fundamentals:** Cloud Computing Architecture (NTI), Linux Fundamentals, Git & GitHub Version Control.
- **Tools & Environments:** VS Code, CLion, Jupyter Notebook, Anaconda, Git, GitHub.
- **Core Competencies:** Problem Solving, Competitive Programming (ICPC NMU Community), System Architecture Logic.

EXPERIENCE & PROFESSIONAL TRAINING

Data Engineering Trainee| Digital Egypt Pioneers Initiative (DEPI)

May 2026 – Present

- Enrolled in an intensive, practical training program focusing on end-to-end Data Engineering workflows.
- Developing skills in building data pipelines, handling structured data, database modeling, and big data execution.
- Applying Python, SQL, and data transformation techniques to solve practical real-world data problems.

Cloud Computing Trainee| National Telecommunication Institute (NTI)

2026

- Training in core cloud computing concepts, cloud infrastructure services (IaaS, PaaS, SaaS), and deployment models.
- Gaining hands-on knowledge of cloud network management, security basics, and scalable infrastructure setups to support data workloads.

Full Stack Development Intern | National Telecommunication Institute (NTI)

2025

- Developed responsive web application components and backend business logic using C# and SQL.
- Integrated backend services with relational databases and applied Git workflows for project collaboration.

PROJECTS

Integrated Cafe Management System (Database & Backend Lead)

- Architected a desktop management application handling orders, inventory control, and operational metrics.
- Designed relational database schemas in SQL to support persistent storage and real-time transaction tracking.
- Implemented backend logic in C# for data validation, inventory updates, and analytical reporting.

Data Processing & ETL Lab Projects (DataCamp / IBM Data Engineering Roadmap)

- Built data processing scripts using Python (Pandas/PySpark) and SQL to extract, clean, and transform raw datasets.
- Designed modular query routines to model analytical tables and generate structured reports.

CERTIFICATIONS & SELF-STUDY

- Digital Egypt Pioneers Initiative (DEPI): Data Engineering Professional Track (In Progress).
- NTI Training Certificates: Cloud Computing & Full-Stack Development.
- IBM Data Engineering & DataCamp Data Engineer in Python Track: (In Progress).
- Data Engineer in Python Career Track – DataCamp: (In Progress / Active Track).

LANGUAGES

- Arabic: Native.
- English: Professional Working Proficiency.

ADDITIONAL INFORMATION

- Fast Learner
- Problem Solver
